NOTICE OF PROPOSED AWARD (NOPA)
2014 Industrial Natural Gas Energy Efficient Grants
PON-14-504
February 18, 2015

On November 26, 2014, the California Energy Commission (Energy Commission) released a competitive solicitation to demonstrate and deploy pre-commercial and/or emerging energy efficient technologies that can directly reduce natural gas use in California's industrial sectors. Up to \$8.2 million of Natural Gas Research Program funding is available to fund applications in the PIER Industrial, Agriculture and Water/Wastewater program area. The applicants may request no more than \$1 million for each demonstration project or no more than \$3 million for each deployment project.

The Energy Commission received two proposals by the due date of January 29, 2015. Each proposal was screened, reviewed, evaluated and scored using the criteria in the solicitation. Two proposals passed the Stage One Application Screening.

The attached "Notice of Proposed Awards" identifies each applicant selected and recommended for funding by Energy Commission staff and includes the recommended funding amount and score. The total amount recommended is \$1.95 million.

Funding of proposed projects resulting from this solicitation is contingent upon the approval of these projects at a publicly noticed Energy Commission Business Meeting and execution of a grant agreement. If the Energy Commission is unable to timely negotiate and execute a funding agreement with an Applicant, the Energy Commission, at its sole discretion, reserves the right to cancel or otherwise modify the pending award.

In addition, the Energy Commission reserves the right to negotiate with successful applicants to modify the project scope, schedule, and/or level of funding.

This notice is being mailed to all parties who submitted an application to this solicitation and is also posted on the Energy Commission's website www.energy.ca.gov/contracts/.

For information, please contact Albert De Leon at (916) 654-4299, E-mail: albert.deleon@energy.ca.gov
